

FP200

Swing Door Finger Protector

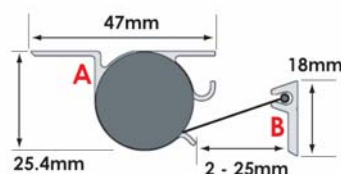

Protect Fingers from getting Trapped at the Hinge Point of Closing Automatic Swing Doors

Easy to install with a unique mechanism that maintains the fabric under constant pressure at all times. Available in 3 different colours

- Protect Small Fingers from Injury:**
 Covering the full length of the door the FP200 ensures that little fingers cannot get trapped in closing automatic swing doors. (1.9m in length)
- Comply with DIN18650 & BS7036 Part 3:**
 “During the opening and closing cycle of a swing or balanced door, a potential finger trap is created. These hazards should be overcome by the installation of a finger guard.” (BS7036 Part 3)
- Durable & Maintenance Free**
 Extremely durable and maintenance free. Tested to over 1 million open & close cycles
- Easy to Install**
 Everything necessary for installation is provided in the FP200 kit, can be installed in a matter of minutes
